PROFILE

Digital designer and front-end developer. I design and build websites and launch campaigns for brands, and I do the whole thing myself: the campaign concept, the copy, the art direction, the front-end build and the testing. Nine live sites delivered for real clients, most recently a full three-act launch campaign for a luxury fashion house, written and shipped in three languages. Four years managing large corporate accounts before I moved into building, so a client brief and a non-technical stakeholder are familiar ground. Looking for a stable role on a creative team.

EXPERIENCE

Founder, Designer and Developer INVITÉ, digital experience studio, Tbilisi

May 2026 to now

Digital experience studio for brand launches, openings and weddings. I own the concept, the client relationship, the design, the front-end build, the testing and the delivery on every project. Delivered the Casa Gelso launch campaign, the JETOUR Georgia bilingual event product and five independent wedding sites, each with its own art direction.

Large Corporate Clients Manager GPI Holding, Vienna Insurance Group

2020 to 2024

Managed relationships with corporate stakeholders and clients: gathering requirements, negotiating terms, prioritising deliverables and taking responsibility for outcomes. This is the foundation for how I now scope and run client-facing digital projects.

SELECTED PROJECTS

Casa Gelso luxury fashion launch, Tbilisi

A three-act launch campaign for a fashion house carrying Ferragamo, Moschino, Tom Ford and Bottega Veneta: a teaser, a scroll-driven brand reveal and a private invitation with RSVP and guest data capture, on one continuous page in English, Georgian and Italian. Campaign concept, storytelling, copy, art direction, front-end, sound, form logic and QA, all by me.

JETOUR Georgia commercial client project

A bilingual event experience with RSVP, Google Sheets data collection, a countdown and location details, delivered end to end with a full QA pass. Reused for a second brand activation.

[digitalinvitee.github.io/JETOUR](https://github.com/digitalinvitee/JETOUR)

Five wedding experiences independent live sites

Five live wedding sites sharing one feature system of RSVP, maps, schedules, galleries and multilingual UI, with five distinct visual identities.
